- Responsive Web Design
- Version Control (Git)
- WordPress

### CORE TOOLS

---

- **Programming Tools:** Visual Studio Code, WordPress, MailChimp, Git, npm, yarn, pip.

### PROFESSIONAL EXPERIENCE

---

#### Software Developer

Developing and maintaining websites and Codebase.

**Total Scope Marketing Solutions.**

**2023-Present**

#### Projects Achievements

#### **Total Scope Marketing Solutions (tsmsconsulting.com)**

- I successfully developed the agency's website, giving it a modern and attractive yet professional look.
- I worked with a team of developers and designer to ensure the ideas and vision of the managing director is achieved
- I ensured the functionality of the website back-end activities.
- I developed and maintained platforms owned and created by the company

#### **Nigerian Fintech Festival (nigerianfintechfestival.com)**

- I successfully developed the website, ensuring it has a great user interface and experience
- I constantly manage and update the website according to the progress of the company's agenda for the event which racked up over 800 registered attendees for the maiden edition.
- I integrated APIs such as Mailchimp, capturing attendees and sponsors registrations into different audience tags for easy identification and promotion.

**Youth For Fintech (youthsforfintech.org)**

- I created the website with a team of developers which was aimed at attracting youths who have interest in delving into the fintech industry.
- I collaborated and managed the frontend of the website for both the first and second edition of the program resulting in a successful event.

**Junior Developer (Intern)**

Web design/Web application development  
**Dinny Tech Ltd.**

**2023-2023**

**Projects Achievements**

**Website and Web Apps**

- I took part in the development of a Learning Management System website with senior software engineers using Next.js, managing both the front and back-end operations.
- I created and maintained the user interface of personal and academically relevant website.
- I created web applications and games for kids, a Memorization game and a Rock Paper Scissors game using the JavaScript language.
- I collaborated with designers to transform mock-up and wire-frames into functional web pages.
- I used the techniques of the responsive design in order to improve the site.
- I developed a website for a food recipe company by creating a landing page with HTML and CSS.
- I developed the front-end of a chat application project

**Software Maintenance and Debugging of programs**

- I utilized React.js technology to enable reusable components of the web application which improved page load time, log-in time.
- I utilized various UI libraries and components to improve the interface, increase actual time spent on the website and the level of the users interaction with the website.
- I participated in the code reviews and scrum sprint meetings and contributed to the development as well as advice implementation that aims at changing coding behaviour and boosting software usage.
- I continuously enhanced skills through online courses and coding challenges on platforms like Figma.com and FrontendMentor.io

**EDUCATION**

**B.Agric Plant Physiology and Crop Production**  
**Federal University of Agriculture Abeokuta**

**2016-2021**

**CERTIFICATIONS AND TRAININGS**

- EarlyBell Academy (FullStack)

**2024**

**REFERENCE: Available on Request.**
